🪪 PROFILE

I'm a senior Computer Science student, and I proudly consider myself a self-learner.

This means I can work with various frameworks, such as Angular and React, or even better, I can rely on myself to learn new things, which is much needed in our fast-changing field.

I studied front-end at Route Academy (HTML5, CSS3, Bootstrap 5, JavaScript, Ajax, DOM/BOM, TypeScript, React) and worked on 10+ projects with them. I'm currently training at DEPI, focusing on Angular.

Besides, I'm flexible when it comes to teamwork, as I work on 3+ projects yearly, whether for college or summer training. That experience has been really helpful as a front-end developer who often needs to collaborate with UI/UX designers, back-end developers, and other teammates.
